1977

Snugpak® produce the first insulated vests.

1983

Sleeping bags first made on custom built automated machinery.

1988

Lead the way in pack size sleeping bags with the launch of the Softie® 3.

1992

First fully automated sleeping bag / jacket production line goes live.

1997

Snugpak® goes international launching across Europe, America and the Far East.

1977 1980 1983 1987 1988 1990 1992 1995 1997

1980's

Force 7 all weather insulated jacket first promoted.

1987

Exclusive Softie® insulation is developed and launched as a viable alternative to down.

1990

Start to become a force in the military.

1995

Snugpak® help develop a synthetic fill diving under suit for Weezle Diving.

ABOUT US

We've come a long way since 1977 when our founder Brett Harris noticed a gap in the UK market for body warmers and taught himself to sew at his kitchen table so that he could create products to fill that gap. We've built on this experience and now we're selling outdoor clothing and equipment around the world. Our products are found at the top of mountains and the bottom of oceans and everywhere in between.

2002

Snugpak® wins Queens Award for Enterprise

2008

Snugpak® diversify into camping accessories and travel items.

2011

Snugpak® wins Novel Awards for Best Sleeping Bag Innovation.

Introduction of brand Ambassadors

2000
Snugpak® Weezle Diving Suit wins Millenium Products award.

Snugpak is unique. Generations of outdoor and military customers have come to rely on the Snugpak brand to provide them with dependable and effective kit. We're one of the only companies that still manufactures sleeping bags and outdoor clothing in Europe. When you choose a Snugpak product, you can rely on its quality – every product is made to last and designed to work. Snugpak products are created for everyone, wherever they are, whatever adventure they are planning. Snugpak – with you for the journey.

VENTURE RANGE

The Snugpak® Venture Range is a series of innovative windtops and synthetic insulation layers, designed to support a diverse range of outdoor activities.

Throughout the Venture Range designs, there are various Hook & Loop patches, designed to accommodate APALS®.

Personal Identification (PID) LEDs, or 3M Scotchlite™ Reflective Tabs to make you more visible in low-light conditions.

Small APALS® patches are located on the back of the collar, as well as the left sleeve. There is also a larger soft Hook & Loop patch on the right arm, for ID's or Group Organisation Patches, allowing you to personalise your Venture Jacket.

Heavy duty, closely constructed outer fabric. Paratex Micro is exceptionally hard wearing but still remains soft to the touch.

VENTURE RANGE COMES WITH COMPLIMENTARY APALS®

The All Purpose Adhesive Light Strips (APALS) are a battery powered light source. When in use can be seen up to half a mile away, handy for running in poor light.

For most of the Snugpak® Venture Range, the hood has been removed, allowing greater compatibility with other items of clothing, but the storage space remains. This allows you to roll up items such as a neck scarf, Buff®, fleece liner gloves or skull cap and store them close to hand.

HOOD STORAGE SPACE

The Venture Range includes a multifunctional pocket design exclusive to Snugpak®. Used for storage of a full size (large) map case, such as the SILVA® Carry Dry Map Case (265x480mm), or an iPad® mini™ within a waterproof eCase® (185x238mm). The main pocket also incorporates two D-rings to secure essential items, such as a compass or whistle, to prevent accidental loss.

The Venture Windtop and TS1 Jacket can also be folded into the pocket making it easy to pack and carry with you.

Multifunctional Pocket
Design Registered
4039556

Accessible pocket for keeping your compass close to hand or securing smaller energy gels, pens, pencils etc when on the move.

FRONT HOOK AND LOOP

R.S TS1 SMOCK

Soft Hook & Loop is also available on the front of the small 'outer-pouch', for either an APALS® LED or reflective marker.

BASECAMP OPS

The Basecamp Range is an ideal introduction to Snugpak's range of sleeping bags. These chunky, warm and comfortable bags are made to the same exacting standards as the rest of the range, with an Isofibre filling that provides considerable warmth.

Highly silconised synthetic fibres give a soft touch and prolonged lifespan compared to traditional fibre filled products.

HANGING TABS

A simple but important touch, our hanging tabs can be used to easily hang your sleeping bag for airing and drying.

INTERNAL LINER FASTENING

Each sleeping bag includes two internal fixed liner tabs, these tabs correspond to the tabs on Snugpak sleeping bag liners. Once attached to each other, this helps keep the sleeping bag liner in position and helps prevent twisting and movement when sleeping. Check page 30 for our sleeping bag liners.

ANTI-SNAG ZIP WITH FULL LENGTH BAFFLE
To prevent the 2-way zip from snagging either the zip baffle or the bag edges, an "anti-snag strip" of webbing is sewn in behind the zip. The full length baffle prevents heat from escaping through the zip area.

REINFORCED FOOT
So strong you can even sleep with your boots on!

SOFTIE® 10 HARRIER

SNUGFIT HOOD
The quilted top of the bag is tailored, pleated, and fitted with a drawcord so it pulls into shape, rather like a jacket hood.

FEATURING

The Softie® Elite sleeping bag has a unique expanding system called the EPS (Expanda Panel System), this allows the user the option to make the bag wider when required. You can do this to give yourself more room to move or to help cool the bag allowing you to regulate your body heat for a more comfortable night's sleep. When not fully expanded the EPS system acts as a jumbo zip baffle.

- Expansion System (Variable width)
- Lightweight
- Low pack size
- Clips can be used to shorten the sleeping bag (Normal Length 220cm, Shortened Length 175cm)

ANTARCTIC MAT

In very cold weather, self-inflating, rubber-based mats can crack when rolled and valves can freeze, rendering them useless. Unlike regular mats **The Antarctic** mat is insulated with Softie® sleeping bag insulation. This ensures thermal performance in the most demanding conditions.

DRI-SAK WITH AIR VALVE 40 LITRE

- 100% waterproof
- Durable & lightweight
- Roll-top waterproof closure
- Durable buckle secures roll top
- D-Rings for securing if necessary

Introducing the new 40 litre compression dri-sak. A heavy duty, waterproof, storage bag with a roll and clip seal

AVAILABLE IN

OLIVE

**WEIGHT
130G**

Other DRI-SAKS without valve available in Black, Olive and Coyote. See page 29

DRI-SAK WITH AIR VALVE

DIRECTIONS FOR USE

Place items into the bag. Ensure the valve is open and press down to squeeze the majority of the air out.

Bring the top opening seals together and fold over.

Fold over 3-5 times.

Clip the buckles together to create a tight seal.

Further compression can be achieved by applying downward pressure. To ensure the contents do not block the valve opening, it may be necessary to push inwards with your finger.

Close the valve, the dry bag is now sealed.

TENTS

The Journey Solo

is a lightweight durable single person bivvi tent. It's waterproof fly can be easily removed to allow the full mosquito net inner to be used on its own on dry warm nights for a cooler nights sleep and a view of the stars. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

AVAILABLE IN

SUNBURST ORANGE

The Journey Duo

is a practical two person tent with a low profile design, excellent in high winds, with ample storage in it's generous front porch. Large front door with mosquito net ventilation panel. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

AVAILABLE IN

SUNBURST ORANGE

The Journey Trio

is a compact and practical three person tent, the extended porch and dome design creates a roomy interior. Ideal for back-packing and extended ventures. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

AVAILABLE IN

SUNBURST ORANGE

The Journey Quad

is a generous sleeping area for four persons with extended living compartment for storing your camping necessities. The Quad is also a "Fly First" pitch type tent. This means you erect the Fly first as the main structure, and then the inner tent attaches from inside to the fly. Just as suited to weekend breaks as longer trips. Constructed with a durable ground sheet in a bathtub style. Supplied complete with a tailored tent footprint to help protect the ground sheet.

AVAILABLE IN

SUNBURST ORANGE
