**BOOTMAKER TO THE GOOD GUYS**

# AMERICAN OWNED. BATTLE TESTED BY OUR COUNTRY'S BEST.

## *OUR MISSION*

**Our mission is simple:** to build footwear that enables elite athletic performance while delivering comfort and safety with world-class footwear.

**High-Performance:** With the highest stakes imaginable, you can't be worried about whether your footwear will hold up. Our boots are equipped with advanced materials and technologies that provide durability, traction, and support, ensuring you can tackle any operation head-on.

**High-Comfort:** Comfort is non-negotiable. Each pair of OTB Boots is designed with ergonomic considerations, superior cushioning, and moisture-wicking properties, allowing you to focus on the task at hand without distraction.

# TABLE OF CONTENTS

Our passion for excellence drives us to design boots that not only perform in the toughest environments but also provide unparalleled comfort for all-day wear.

## About Us

# WELCOME TO OTB BOOTS

We are a group of footwear professionals with a passion for the outdoors. We strive to make products for specific outdoor adventures rather than for fashion.

We were honored when asked by the U.S. Navy SEALs to design and engineer a series of boots to be used for operations in and around the water. After many focus groups with SEAL Operators, the line of boots now known as OTB – short for Over the Beach – was born.

In addition to the Navy SEALs, we listened to our other Special Forces customers with the goal of delivering products worthy of being called the best in the field. Our footwear was conceived for very extraordinary purposes. By focusing on the needs of the user in specific situations we are able to concentrate on the product and not the fluff.

Using high-tech materials and cutting edge manufacturing techniques allows us to make very special products. Our shoes and boots are tested under the toughest conditions in a laboratory environment as well as in critical field wear tests.

OTB has been approved by SOF Operators, divemasters, and outdoor guides worldwide. We are dedicated to crafting high-performance, high-comfort tactical footwear that meets the rigorous demands of military personnel, law enforcement professionals, and civilian enthusiasts alike. Our passion for excellence drives us to design boots that not only perform in the toughest environments but also provide unparalleled comfort for all-day wear.

## Tactical Boots

### M-CARBON SERIES

- M-CARBON 8
- M-CARBON 6

Carbon-plated boot that has been winning both tactical competitions and rave reviews from customers.

### FLEX SERIES

- M-FLEX 8
- FLEX SAFETY SIDE ZIP

Now with a composite toe option. Ruck harder, breathe easier with our best all-around boot — our “SUV” built to conquer any terrain.

### ABYSS

Fast-draining construction for optimal performance in wet environments. Tested and approved by the world's most elite SOF operators.

### T-KOOL MID LEATHER

The low-visibility design makes it an equally perfect boot to wear to the gym or for running around town at the end of the day.

Tactical Boots

T-KOOL MID SUEDE 2.0

Rides like a running shoe with the support and durability of a tactical boot. Now with improved 2.0 outsole.

T-KOOL LOW

The T-Kool Mid's "low-viz" counterpart, the T-Kool Low is perfect for the gym or for running around town at the end of the day

INCLINE MID

6-inch work boot meets badass tactical boot, optimized to conquer rugged terrain and demanding operational environments.

FUSION SERIES

- FUSION 8
- FUSION 6

Based on our game-changing M-Carbon 8 boot, this side zip is custom built for LEOs.

## Tactical Boots

PIRATA SERIES

- ELITE
- MID
- LOW

The next evolution in subsurface and above-waterline footwear.

M-CARBON SERIES

## BUILT FOR SPEED

The force multiplier this boot provides is almost unfair. Featuring OTB's carbon fiber propulsion plate, the M-Carbon boots are true game-changers.

*"These boots are a gamechanger. Wore Garmont NFS's for 2 years and these feel better than those in every way. Lighter, more comfortable, more breathable, and a big thing for me is the detached tongue which makes this shoe feel like a running shoe. Right out the box these felt incredible, and the carbon plate helps me roll into every step. 11/10, will continue to wear these boots until my contract expires." - Jacob M. 4/25/25*

**Best For:**

- Optimal Athletic Performance & Running
- Sub-40 pound rucks
- Selections
- School
- Competitions
- Obstacle Courses

**Features:**

- Marathon-inspired carbon plate for spring, support, and enhanced forward propulsion.
- Lightweight Future Foam EVA midsole. Rides like a running shoe.
- The only carbon-plated AR-670-1 / AFI 36-2903 compliant boot
- Removable performance INSITE® Contoura® PU Footbed
- High abrasion GRIP-STIK-FIELD rubber outsole compound for unsurpassed traction on road rucks

**Best For:**

- Optimal Athletic Performance & Running
- Sub-40 pound rucks Selections
- School
- Competitions
- Obstacle Courses

**Features:**

- Marathon-inspired carbon plate for spring, support, and enhanced forward propulsion.
- Lightweight Future Foam EVA midsole. Rides like a running shoe.
- Removable performance INSITE® Contoura® PU Footbed
- High abrasion GRIP-STIK-FIELD rubber outsole compound for unsurpassed traction on road rucks

# BUILT FOR SUPPORT

Ruck harder, breathe easier with our best all-around boot. Conquer any terrain with OTB's M-Flex 8. Compliant for U.S. Army Wear with MultiCam® & OCP and U.S. Air Force Wear with OCP.

*"As an infantryman, I've never had a better boot."* - Riley M. 6/8/25

**Best For:**

- Field Operations
- All-Terrain Performance
- Optimal Support Underfoot
- 40-50+ Pound Rucks
- Traction in Mud & Snow

**Features:**

- High rebound comfort performance PU midsole
- Removable performance INSITE® Contoura® PU Footbed
- Full-length internal molded polypropylene support board for stability and support under heavy loads
- High abrasion GRIP-STIK-FIELD rubber outsole compound for unsurpassed traction in all conditions

FLEX SAFETY SIDE ZIP

## NOW AVAILABLE IN COMPOSITE TOE

ASTM 2413 Certified Composite Safety Toe boot with a YKK inside side zip for easy donning and doffing.

*One of our most commonly requested feature upgrades from military operators is to make a safety boot. We are now offering our best all-around boot, the M-Flex 8, in a Safety Side Zip model. This boot is built to withstand just about any operational conditions you throw at it!*

## FLEX SAFETY SIDE ZIP

**Best For:**

- Field Operations
- All-Terrain Performance
- Optimal Support Underfoot
- 40-50+ Pound Rucks
- Traction in Mud & Snow

**Features:**

- ASTM 2413 Certified Composite Safety Toe
- YKK inside side zip
- High rebound Future Foam EVA midsole.
- Removable performance INSITE® Contoura® PU Footbed.
- Full length internal molded polypropylene Fusion board for stability and support under heavy loads.
- High abrasion GRIP-STIK FIELD rubber outsole compound for unsurpassed traction in all conditions.

## NAVY SEAL APPROVED

Fast-draining construction for optimal performance in wet environments. Tested and approved by the world's most elite SOF operators. The boot that started it all for OTB.

*"Amazing quality, grip, and comfort. Can take a beating in a variety of terrain/environmental conditions. Boots fit very snug around the ankle during the break-in period, which can be a little uncomfortable, but nothing you can't overcome. Definitely recommend!" - Matthew H. 12/17/24*

**Best For:**

- Water, Dive, and Over the Beach (OTB) missions. The Abyss is compatible with military swim fins.

**Features:**

- Wet surface multi-traction GRIP-STIK-WET outsole with operationally tested serrated heel design for traction on caving ladder rungs
- Field-tested GRIP-STIK-WET climbing rubber rand with strategically placed drainage ports provides traction and protection
- Future Foam EVA cushion with full-length polypropylene shank for stiffness and support when climbing a caving ladder.
- Water-tight EVA footbed with drain port system designed to aid in water evacuation

## “LOW-VIZ” HIGH-PERFORMANCE BOOT

Traction and support needed to tackle operational conditions and the low-visibility design makes it an equally perfect boot to wear to the gym or for running around town at the end of the day.

*“Needed durable black boots, good for rucking a fair distance and can withstand rough terrain for search and rescue uniform. Spent 22 years in the Army so I’m very particular about my boots. They are comfortable and ready to use out of the box (OTB). I wear a size 11.5 in my long distance running shoes, 11 regular shoes, got an 11, was worried about the toe room. Plenty of room for your foot in there, but not so much your foot is going to slip and cause blisters, heel cup really locks your foot without being a problem. I’ve done a couple of short distance rucks <5 miles, 35# with zero issues. Like wearing broken in running shoes.” - Marcus B. 5/16/25*

**T-KOOL MID LEATHER**

**Black Suede/Brown Suede/ Black Leather**

**Best For:**

- When you need a boot that can hold up in operational environments and provide low visibility outside the wire

**Features:**

- Athletic Comfort Foundation
- High abrasion GRIP-STIK field rubber sole with reverse herringbone lugs for superior traction at the range or on caving ladders
- Lightweight Future Foam EVA midsole for a running shoe-like ride. Perfect footwear for the gym.
- Full-length plated midsole sole unit provides superior support when carrying a heavy ruck or for climbing

T-KOOL MID SUEDE 2.0

## LOW-VIZ. HIGH-PERFORMANCE.

Now with a new & improved 2.0 outsole, this “low-viz”, high-performance boot delivers the traction and support needed to tackle operational conditions.

*“I love these boots. Low key enough to wear out in town. The soles provide good traction during training.” Peter M. 6/2/25*

Waterproof suede upper for comfort and long lasting support

Lightweight Future Foam EVA midsole for a running shoe-like ride. Perfect footwear for the gym.

## T-KOOL MID SUEDE 2.0

**Brown Suede/ Black Suede**

**Best For:**

- When you need a boot that can hold up in operational environments and provide low visibility outside the wire.

**Features:**

- High abrasion GRIP-STIK field rubber sole with reverse herringbone lugs for superior traction at the range or on caving ladders
- Lightweight Future Foam EVA midsole for a running shoe-like ride. Perfect footwear for the gym.
- Full-length plated midsole sole unit provides superior support when carrying a heavy ruck or for climbing

T-KOOL LOW

## LOW-VIZ. LOW CUT. HIGH-PERFORMANCE.

The T-Kool Mid's "low-viz, low cut" counterpart, the T-Kool Low is perfect for the gym or for running around town at the end of the day. It features a lightweight future foam EVA midsole for a running shoe-like ride.

# T-KOOL LOW

**Black Camo/ Brown Camo/ Black Nylon**

**Best For:**

- When you need a low-cut boot that can hold up in operational environments and provide low visibility outside the wire.

**Features:**

- High abrasion GRIP-STIK field rubber sole with reverse herringbone lugs for superior traction at the range or on caving ladders
- Lightweight Future Foam EVA midsole for a running shoe-like ride. Perfect footwear for the gym.
- Full-length plated midsole sole unit provides superior support when carrying a heavy ruck or for climbing

INCLINE MID

## RUGGED, DURABLE & WATERPROOF.

Featuring the highest quality waterproof leather, rugged durability, and a fully waterproof inner membrane featuring Hydroguard® technology.

*The Incline Mid is made for cold days, wet trails, and unpredictable terrain. A waterproof boot with warmth, grip, and athletic comfort for all operational conditions including rucking in rugged terrain. Featuring a fully waterproof inner membrane with Hydroguard® technology, this boot offers best-in-class durability and support.*

Full waterproof Hydroguard® lining for keeping you dry when the conditions are wet

European inspired internal Fusion plate for support under a heavy load

High abrasion GRIP-STIK FIELD rubber outsole

## INCLINE MID

**Black/Choco/Brown**

**Best For:**

- High-speed tactical missions and hard-duty work environments where athletic comfort, support under load, and rugged durability are critical. Ideal for fast-rope, breaching, and operating in wet or rough terrain.

**Features:**

- European inspired internal Fusion plate for support under a heavy load
- Lightweight Future Foam EVA midsole for a running shoe-like ride
- High abrasion GRIP-STIK FIELD rubber outsole compound for unsurpassed traction in a variety of conditions. The lug design works both wet and dry and excels in rugged terrain.
- Extended rubber toe bumper protection when taking a knee or kicking in a door
- Inside rubber fast rope guard protects you during multiple fast ropings

FUSION ZIP SERIES

## CUSTOM BUILT FOR LEO'S.

Based on our game-changing M-Carbon 8 boot, this side zip is custom built for Law Enforcement Officers.

*Our #1 most commonly requested model from our customers is a black boot for law enforcement officers. We are now offering the Fusion Side Zip in both 6" and 8" models, both built for maximum comfort and athletic performance.*

Full air mesh lining for 360° air circulation

YKK inside side zip for easy donning & doffing

Full length Fusion plate provides dynamic support when wearing rucks and body armor

Lightweight Future Foam EVA midsole for a running shoe-like ride

## FUSION 8

**Best For:**

- Optimal performance and comfort for law enforcement

**Features:**

- Full length Fusion plate provides dynamic support when wearing rucks and body armor
- Lightweight Future Foam EVA midsole for a running shoe-like ride
- Removable performance Foamwell breathable PU insole
- High abrasion GRIP-STIK FIELD rubber outsole compound for unsurpassed traction

Full air mesh lining for 360° air circulation

Full length Fusion plate provides dynamic support when wearing rucks and body armor

Lightweight Future Foam EVA midsole for a running shoe-like ride

YKK inside side zip for easy donning & doffing

## FUSION 6

**Best For:**

- Optimal performance and comfort for law enforcement

**Features:**

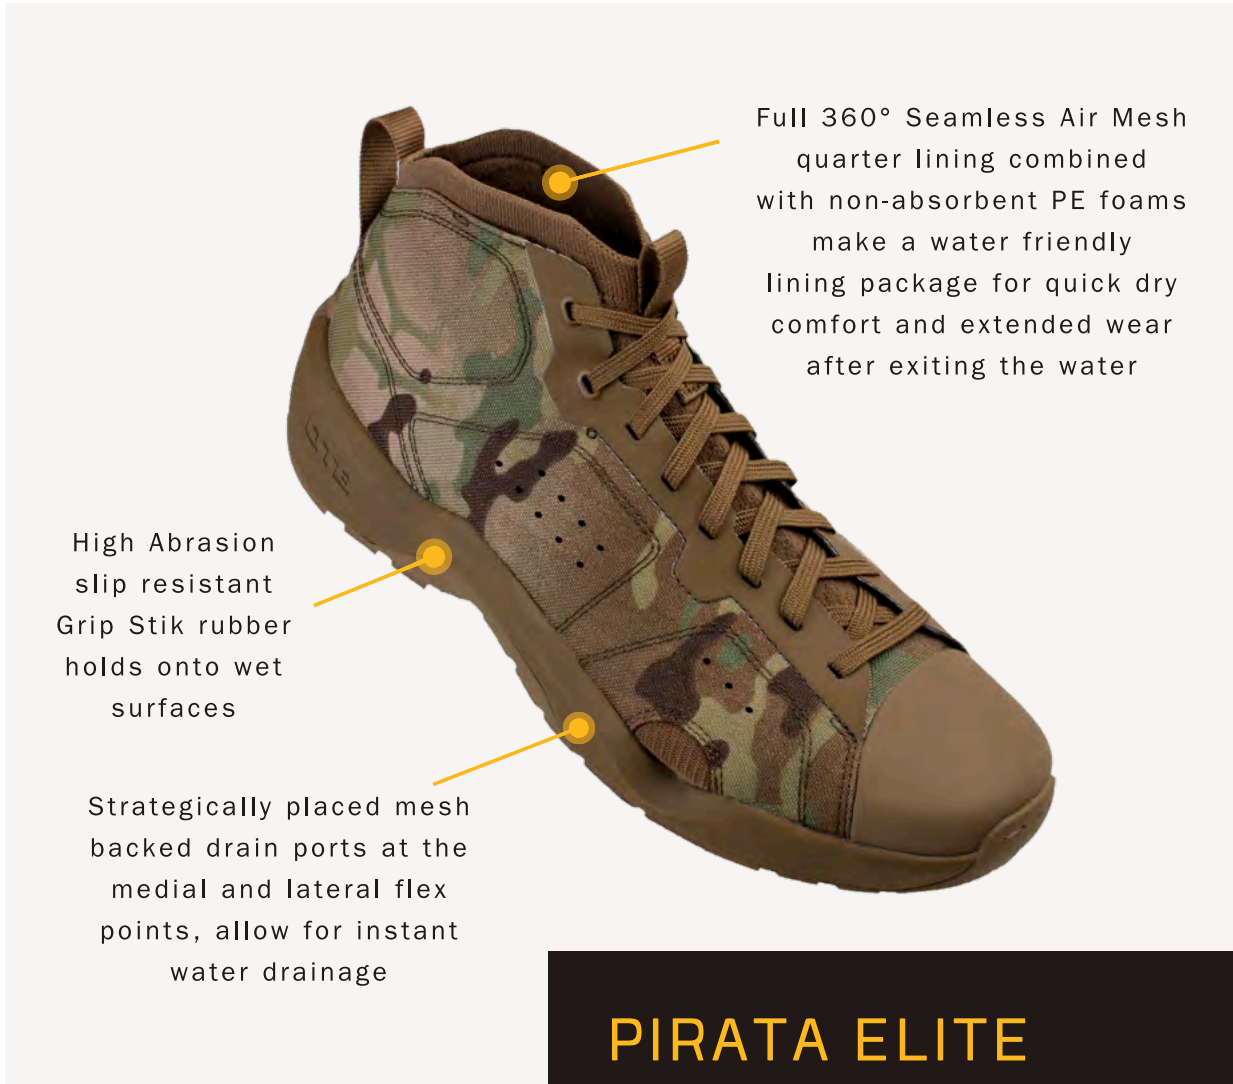

- Full length Fusion plate provides dynamic support when wearing rucks and body armor
- Lightweight Future Foam EVA midsole for a running shoe-like ride
- Removable performance Foamwell breathable PU insole
- High abrasion GRIP-STIK FIELD rubber outsole compound for unsurpassed traction

PIRATA SERIES

## IT'S PRONOUNCED "PEE-RA-TA"

The all-new Pirata Series from OTB Boots is purpose-built to bridge maritime and land-based operations without compromise. The line includes the Pirata Elite, Pirata Mid, and Pirata Low, giving retailers a clear, tiered offering for different use cases. The Elite features a knit collar that completely eliminates sand infiltration and is optimized for wet, sandy, and maritime environments, while the Mid and Low are designed for above-waterline and land-dominant operations where sand exposure is minimal. All models share the same core DNA: a widened, stable fit; fast-rope guards on both sides; a flexible-toe with stiff-shank Fusion Plate for rucking support; and aggressive, high-traction rubber proven on submarine decks and maritime surfaces.

Full 360° Seamless Air Mesh quarter lining combined with non-absorbent PE foams make a water friendly lining package for quick dry comfort and extended wear after exiting the water

High Abrasion slip resistant Grip Stik rubber holds onto wet surfaces

Strategically placed mesh backed drain ports at the medial and lateral flex points, allow for instant water drainage

## PIRATA ELITE

**Camo/Black**

**Features:**

- Full length Fusion Plate embedded into the midsole provides full length support and rigidity in the shank - perfect for climbing caving ladders
- Removable Contoura® Insite®
- High Abrasion slip resistant GRIP-STIK FIELD rubber
- Full 360° Seamless Air Mesh quarter lining combined with non-absorbent PE foams make a water friendly lining package for quick dry comfort and extended wear after exiting the water.
- 1000D Cordura® quarter side panels for unsurpassed abrasion resistance.
- No-sew PU laminated seamless eyerow, is void of lower metal eyelets, thus eliminating top of the foot pressure irritation.

## Sizing & Fit Guide

### BEST-IN-CLASS BOOTS

Backed by Outstanding  
Customer Service.

<b>US</b>	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	11.5	12	13	14	15
<b>UK</b>	4	4.5	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	10.5	11	12	13	14
<b>EU</b>	37	37.5	38	39	39.5	40	41	41.5	42	42.5	43	43.5	44	44.5	45	46	47	48

OTB Boots are designed to fit true to size when measured using a standard Brannock Device (the silver metal tool used in shoe stores for foot measurements).

Our sizing is similar to many popular running shoe brands, including Hoka, Asics, Brooks, and Altra.

For women, we recommend subtracting 1.5 from your running shoe size to find your OTB Boot size (e.g., if you wear a size 8.5 in women's running shoes, you would be a size 7 in OTB Boots).

If you require a wider fit, we offer WIDE options that correspond to approximately EE+ width.
